t rex®

Standard Continuous Hanger™

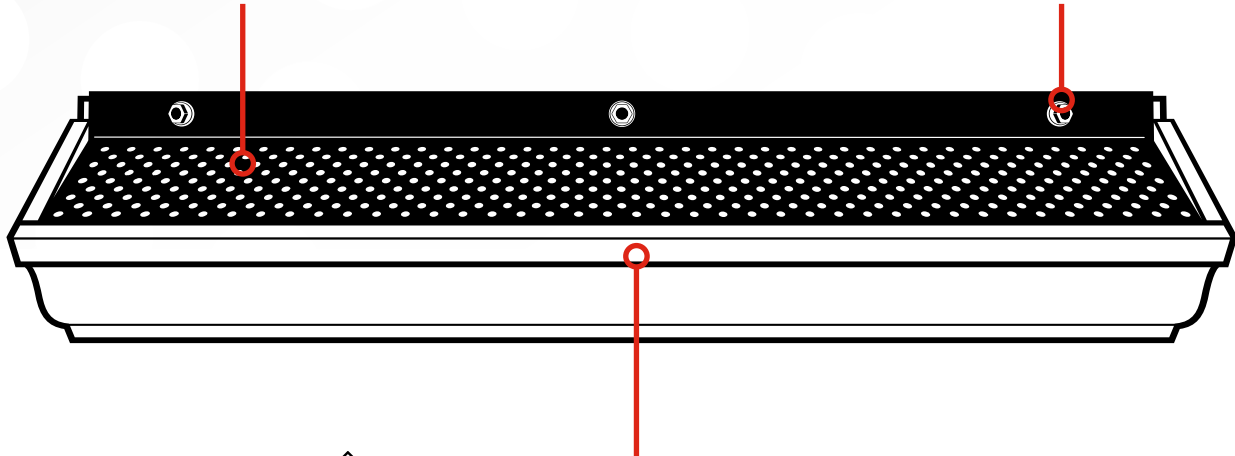

Sturdy Aluminum

Made from aluminum grade 3105 H24, with a sturdy 0.0175" thickness, our product guarantees remarkable strength. Count on its durability for top-notch performance in any setting.

Self-Sealing Screws

The hanger is installed with black Dracotized self-sealing screws, steel-made #10 - 1½" (38 mm) in size, with ¼" (6.4 mm) hexagon heads and integrated rubber gaskets. It reinforces the gutter and reduces the risk of water seeping into the fascia. Screws are included with the product.

Unparalleled Strength

With the T-Rex® Continuous Hanger™, your rain gutters are reinforced from end to end, ensuring uniform support across the entire length with no weak points. It can hold 250 lb (113 kg) per linear foot.
